TURTLES**  
**MINI  
MUTANTS  
TURTLE-TOP  
PLAYSETS™**

Kids,  
follow these  
simple blueprints,  
it's easy!

And now, for the tumultuous escape for any wily Turtle: the Turtle Launchin' Volcano. Say so long to the Turtle who's smart enough to shoot out of the Turtle Launchin' Volcano. Just flick the Volcano Activating Tooth and look-a Turtle who escapes, lives to fight another day!

How to trap a Turtle? Insert the Rattlin' Bone Cage Shaft into Timeless Turtle skull's mouth as shown.  
Rest the Rattlin' Bone Cage on the Second Story Cave Dwelling until some tempting Turtle happens by. Just one quick pull and CRUNCH. The Cage is down and Cave Donatello's is trapped on the Bamboo Bridge. Only you can figure out how to rescue him!! Don't wait! He doesn't want to end up as a cave chandelier for the next 6 million years you know.

There's only one way into and out of the cavernous Cave Playset. The Front Stone Steps can be folded down for access to the Cave, but you have to ask yourself ... why do I want to go in there?

Cave-Turtle Donatello better watch out for the scary Spinnin' Booby Trap Boulder. Just place the Boulder onto the playset as shown and use the thumbwheel below it to spin the Boulder. Maybe Donatello should forget the spin cycle this time, don't you think?

Insert deadly Turtle trippin' Bamboo Bridge to join both halves of the Cave Playset. First insert the flaps on the top of bridge into the groove, then the bottom of the bridge into the groove. Can Cave Donatello meet the challenge and cross the bridge without losing his shell? Only time will tell.

Insert the Battle Boulder Hurlin' Sling-Shot platform as shown and swing out to prepare for a little heavy hurling action.

Load Battle Boulder into Sling Shot as shown. Hold Bebop's heads while pulling back on the sling shot, then release the sling shot. Caution: Do not aim Battle Boulder at anyone's eyes or face.

**START HERE:**

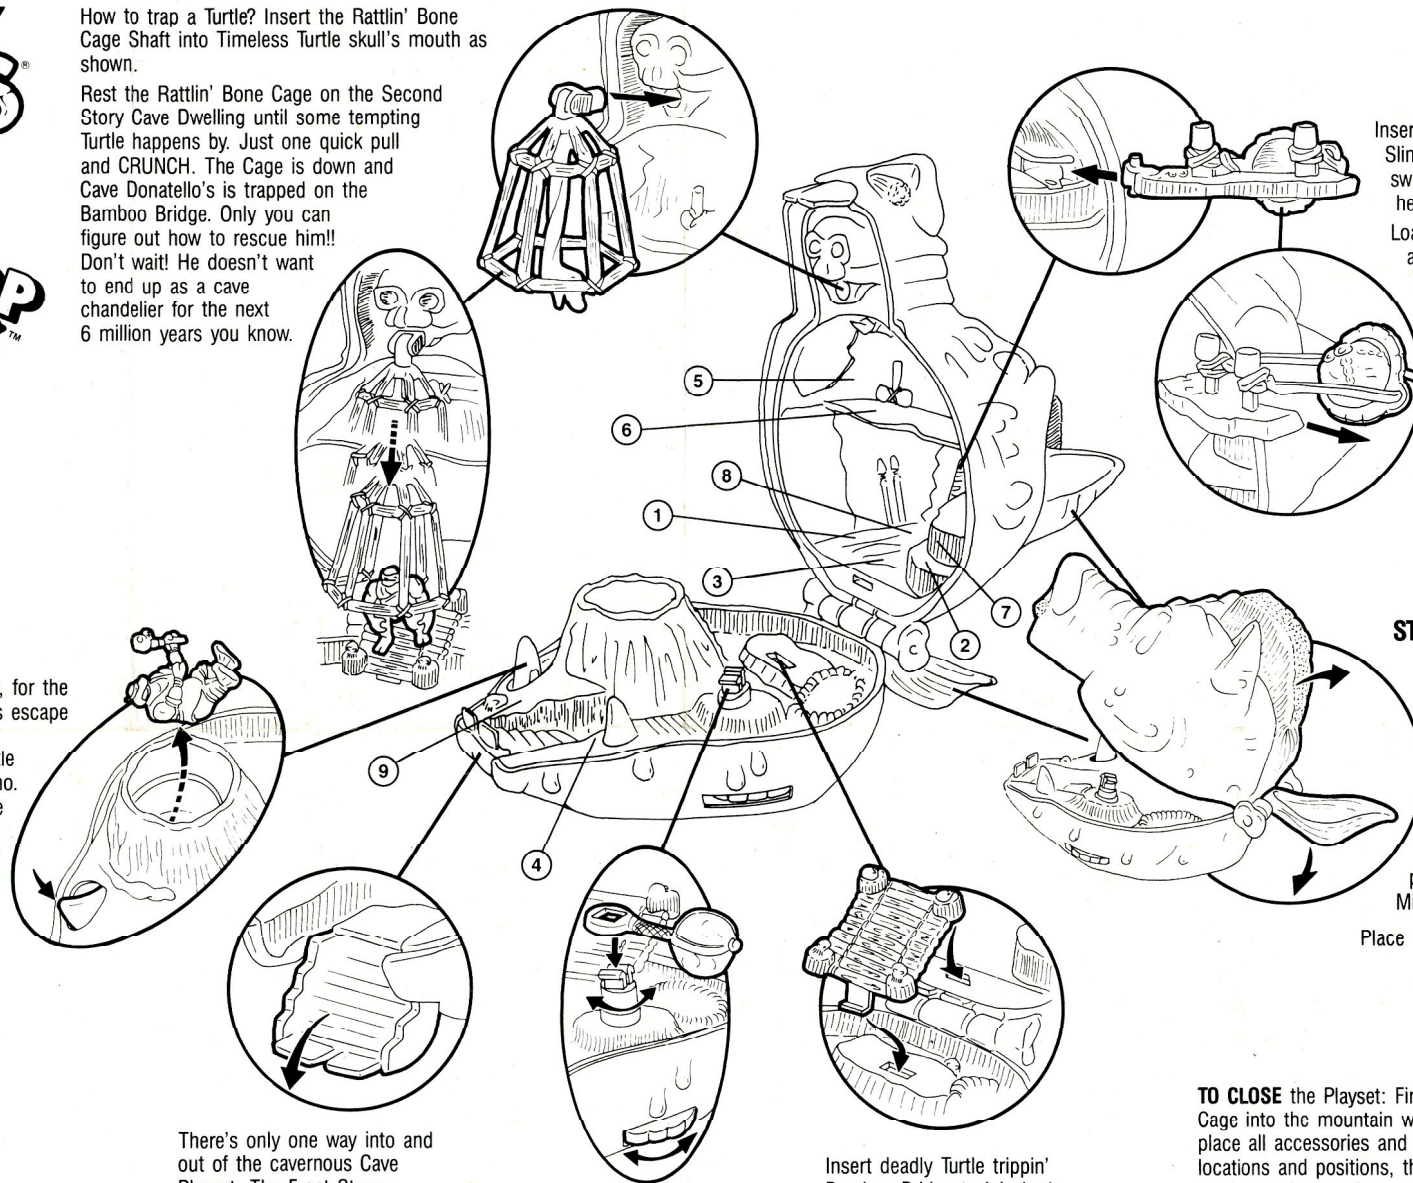

**TO OPEN** the Playset: Firmly hold the bottom half of BEBOP'S head with the one hand. Pull up on the upper half and raise it to a vertical position.

Fold down BEBOP'S ponytail as shown to help support the upper half as you play in and around the Mini-Mutant Cave Playset.

Place labels 1-9 as shown.

**TO CLOSE** the Playset: First, place the Rattlin' Bone Cage into the mountain where it fits securely. Then place all accessories and parts back to their proper locations and positions, then carefully lower the upper shell. Watch your fingers, dudes!

Hey Cave kids, if you want to, try to see how many different ways you can put all the parts back and see how fast you can do it.
